

# BIVEK KASAJU

Windsor, ON, Canada | 226-975-8382 | bkasaju97@gmail.com | [LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

- Full Stack Developer with 3+ years of experience designing and deploying scalable SaaS and enterprise applications using React, TypeScript, Node.js, C#, .NET Core, Java, SQL, MongoDB, Docker, Kubernetes, and cloud platforms (GCP/Azure).

## EDUCATION

### Master of Applied Computing

CGPA: 8.8/10

Sep 2023 - April 2025

University of Windsor, Windsor, ON, Canada

### Bachelor of Engineering, Computer Science & Engineering

CGPA: 8.24/10

Aug 2016 - May 2020

Nitte Meenakshi Institute of Technology, Bangalore, India

## WORK EXPERIENCE

### Software Developer

May 2025 - Present

Utilismart Corporation, Windsor, ON, Canada

- Engineered and deployed microservices using .NET Core and C#, improving data synchronization speed by 35% across multi-tenant SaaS platforms.
- Developed a company-wide Single Sign-On (SSO) system for 5+ enterprise applications, utilizing OAuth 2.0, OpenID Connect, and JWT-based authentication, centralizing access and reducing login friction across the organization.
- Designed and implemented the architecture of a full-stack Unbilled Revenue Report for Ontario clients, including database schema, data pipelines, and interactive UI drill-downs, serving 1000+ users, improving financial reporting accuracy by 30%.
- Led integration testing framework development to validate end-to-end REST API-SQL Server data pipelines, ensuring 100% data accuracy in production.
- Modernized legacy modules to containerized architectures (Docker + Kubernetes), reducing infrastructure costs by 25% and boosting scalability.

### Software Developer Co-op

Sep 2024 - April 2025

Utilismart Corporation, Windsor, ON, Canada

- Rebuilt legacy Java modules into C# services, cutting average API latency by 40%.
- Developed responsive React 18 + TypeScript frontends for real-time utility dashboards serving 1000+ users across Ontario.
- Automated integration and E2E testing using xUnit, MSTest, and Cypress, improving release reliability and reducing QA time by 30%.

### Software Engineer

Jun 2021 - Jul 2023

Cedar Gate Services Pvt. Ltd., Kathmandu, Nepal

- Designed and implemented asynchronous Spring Boot export module cutting report generation time from 10 mins to under 6 mins (40% faster).
- Migrated enterprise frontends to React + Material-UI, improving load performance by 50%, reducing bundle size by 35%.
- Restructured APIs and optimized data access patterns, increasing server query response time by 20%.
- Redesigned scheduled batch jobs with multi-threading, achieving 30-50% faster completion times for nightly data exports.
- Created advanced T-SQL stored procedures, triggers, and indexes, optimizing query performance on large-scale datasets.

### Full Stack Developer, Intern

Jan 2021 - Apr 2021

LIS Nepal Pvt. Ltd., Kathmandu, Nepal

- Developed RESTful APIs (Node.js + Express + MongoDB) and integrated with React frontends for a 25% increase in user conversion.
- Automated database backup to GCP via Python scripts, reducing manual workload by 20%.
- Assisted in implementing CI/CD pipelines using GitHub Actions and Jenkins for faster, safer deployments.

## PROJECTS

### AI Calculator ([Link](#))

Dec 2024 - Jan 2025

- Designed an advanced calculator with a note-style interface using React, enabling users to draw directly on the screen.
- Integrated Python and the Gemini API to convert drawn shapes, formulas, and ideas into meaningful results.

### Job Skills Extraction & Analysis Using NLP ([Link](#))

Jan 2024 - March 2024

- Developed an NLP pipeline achieving 83% extraction accuracy on LinkedIn job data; built a course recommendation engine using cosine similarity on extracted skills.

### Auto Mobile Price Analysis ([Link](#))

Nov 2023 - Dec 2023

- Implemented data structures (Trie, AVL Trees) and web scraping automation to analyze over 1000+ automobile listings, predicting price trends with high efficiency.

### Netflix Clone ([Link](#))

Feb 2023 - April 2023

- Developed a full-stack Netflix clone using React and Node.js featuring authentication, dynamic content, search, personalized recommendations (Collaborative & Content-Based Filtering), offline viewing, and user profiles.
